Every effort has been made to ensure all product photographs, descriptions and specifications in the catalog are accurate. However, inadvertent errors may occur and changes in design or materials due to our continual effort to improve products, may result in specification changes before subsequent publications are issued. Excel reserves the right to modify or change specifications without notice.

gotta get tough, gotta get mean

www.excelboats.net

Friends of Excel,

It has now been nearly 5 years since Excel has re-opened its doors. During this short time Excel has grown considerably while gaining recognition in the aluminum boat industry. The innovative F4 has become the most sought after rig for serious hunters. It has also become the most duplicated design by competitors. The 203 Bay Pro represents a new chapter for Excel in exceptional performance, solid design, craftsmanship and attention to detail.

Excel has been fortunate to have a professional and committed dealer network and customers who support and believe in Excel. We appreciate your loyalty and will continue to do our best to make customers proud to own an Excel.

Our business plan is simple; to provide sportsmen and women with a boat built as if it was our own.

Glenn D. Foreman

CEO Excel Boat Company

Do our best.

OUTBOARD OR SURFACE DRIVE: EXCLUSIVE EXCEL HULL DESIGNS

EXCELERATION PAD HULL™ – The Exceleration™ Pad Hull is engineered to provide the highest degree of performance, stability, handling and seaworthiness in an aluminum boat hull. Water under the boat breaks cleanly and away from the running pad and virtually eliminates hydrodynamic drag. This results in increased performance, speed and handling.

TRIPLE TAPER CHINE™ – The Exceleration™ hull combined with our Triple Taper Chine™ delivers superior performance for Shallow Water and jet motors. The slick bottom glides over skinny water with ease and the Triple Taper chine gives the boat unparalleled turning capabilities with very little surface slip.

VIPER™ CHINE – The hull provides a whole new set of benefits for sportsman that want top end performance from their outboard motors. The Viper™ reverse chine traps water under the boat. This assists boat lift and provides better load capacity. The Viper™ chine runs on the water like a train on it's tracks.

BAY PRO

The Exceleration™ Pad Hull virtually eliminates hydrodynamic drag for increased speed and handling. Sleek lines of the Bay Pro provide maximum interior space and design strength. A large casting deck provides elbow room for fighting trophy fish. Lockable rod boxes keep gear safely stowed. Other features include flip-up jump seats, deluxe center console with rod holders, leaning post, two livewells, integrated trolling motor bracket and over 31 cubic feet of storage. Superliner™ ensures secure footing and a floor drain keeps the floor dry. The Bay Pro represents an exceptional combination of performance, functionality, fishability and craftsmanship.

VIPER™ F4

Acorn loving mallards beware.there is no escape from the Viper™ F4. The Viper™ runs on the water like a “train on its tracks” providing peace-of-mind on early morning runs. An optional bow mounted LED light makes night like day. The patent-pending (optional) KIK-UP™ transom consists of dual heavy-duty gas shocks that helps absorb impact from your outboard’s lower unit in encounters with submerged stumps and logs. The step deck takes the leg-work out of getting in and out of your boat. Heavy-duty gunwales are built to take a beating season-after-season. Still not convinced? Ask Rick Dunn and the Echo team why they think the Viper F4 is the best duck boat made!

F86 BULL NOSE CONSOLE

This is one tough hunting and fishing machine. A massive, crash-resistant tubular bow means business. The Bull Nose Center Console is the ticket for coastal flats, tidal mud, marsh or the river. The streamlined, aluminum center console allows for a better vantage point and comfort on long runs. Twin rod/gun boxes and front deck storage provide plenty of room for gear. The rear F4 step deck makes climbing in and out of the boat effortless. The stout transom of the 1860B86CC is designed to support twin surface drive motors for maximum muscle. The Bull Nose's shallow water hull is also ideal for jet outboards.

F4 SHALLOW WATER

One look at the streamlined and aggressive profile of the Excel F4 and you know this boat means serious business. And beauty runs deep in the F4. Tank-like construction provides the hull strength needed for backwater travel. In the rare situation that something dare stand in the F4's way, an optional built-in 3000 lb. winch permits access to the inaccessible. The F4 step deck enables hunters' easy access into the boat, serves as an ideal vantage point for your retriever and eliminates backslash for a drier boat ride. Storage is integrated into rear seats and every F4 is equipped with a gun box.

BOATS

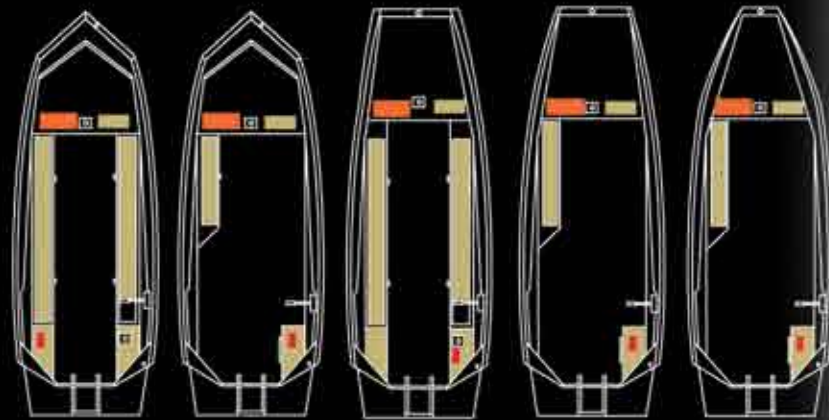

1/4" Tube Bow

F86 SHALLOW WATER

The F86 coins the word tough. It is built with 5086 .125 gauge aluminum, the toughest and lightest aluminum you can get for a high end duck boat. The F86 line of professional hunting boats were designed by Glenn Foreman, the CEO of Excel and a 40 year veteran of backwater travel. His passion for the outdoors and understanding of what it takes to make a duck hunting boat is exemplified in this exceptional boat model. The F86 design focus is on ample storage, lots of foot-room and everything - and we mean everything in the right place. If you are looking for top quality at a great price, check out the pro grade F86. While your are at it, check out the B series F86 with its 1/4" crash resistant tubular bow rail.

1851V86TB - 1851V860FP - 1851F86TB - 1851F860FP - 1851B86

I can count on Excel and Mud Buddy to take me to the ducks and back again. J. Paul - Drake's Migration Nation.

STALKER

Whether running the choppy bay waters of the gulf coast or glassy coves of your local reservoir, the Stalker™ planes fast and smooth. Unlike comparable boats of its size, the Stalker™ also runs in shallow, hard to reach areas where big fish lurk. Large front and rear casting decks and ample interior walk-around room provide plenty of elbow-room and comfort on all day excursions and ensure maximum fish-ability.

BOATING FEATURES ACCESSORIES & OPTIONS

Trick-out your hunting and fishing rig with Excel accessories. LED Spotlights, heavy-duty dog ladders, winch, gun boxes, rod/lure holders, accessory trays and jump seats maximize your hunting and fishing enjoyment and efficiency.

BUILT-IN WINCH

Optional 3000LB built-in winch permits access to the inaccessible.

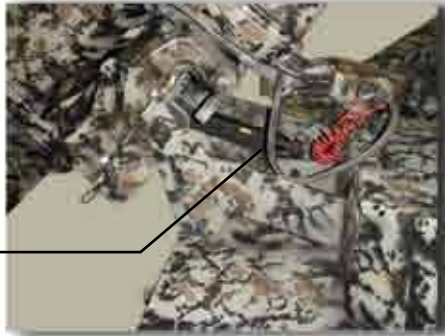

INTERIOR PANEL

Interior courtesy light panel, 12 volt plug and rocker switches with breakers are standard on all Excel boats.

EXCEL F4 KIK-UP™

Do you run obstacle ridden river bottoms and waterways? Have no fear. Heavy-duty, dual gas shocks on the KIK-UP™ help absorb impact that the lower unit encounters with submerged objects at low speeds.

EXCEL CONSOLES

Loaded with convenience and style. Full gauges, bilge, 12 volt accessory, running lights, trim and safety shut off. We use quality manual and hydraulic steering systems ensuring years of dependability.

standard features & accessories

BUILT IN DUCK BOAT FUEL TANK WITH FLIP TOP FUEL FILL

EXCEL BOAT HULL DESIGNATIONS:

EXCELERATION™ PAD HULL:

This fast hull is engineered to provide the highest degree of performance, stability, handling and seaworthiness in an aluminum boat hull. Water under the boat breaks cleanly and away from the running pad and virtually eliminates hydrodynamic drag. This results in increased performance, speed and handling.

SHALLOW WATER SERIES:

The slick bottom of the **Shallow Water Series** glides over skinny water with ease and the Triple Taper chine gives the boat unparalleled turning capabilities in thick mud and heavy vegetation.

VIPER™ SERIES:

The **Viper™ Series** reverse chine traps water under the boat for better lift, speed and allows the Viper™ to turn flat and hold tight with every turn.
